RESULTS:

According to the scale proposed by Landis and Koch (10) and the method proposed by Gwet (11), inter-rater agreement was found to be substantial at baseline, with Gwet's AC1 0.71 (95% CI 0.623-0.797) and Krippendorff's Alpha 0.6 (95% CI 0.416-0.778). Inter-rater agreement then reduced to moderate agreement in the post intervention surveys, with a Gwet AC1 of 0.575 (95% CI 0.469-0.680) and Krippendorff's Alpha of 0.5 (95% CI 0.327-0.691) at 1-week post intervention, and Gwet AC1 of 0.598 (95% CI 0.497-0.701) and Krippendorff Alpha of 0.52 (95% CI 0.335-0.694) at 6-weeks post intervention. The change in level of agreement between the baseline study and the post-intervention studies at 1 and 6 weeks was statistically significant with a difference in Gwet AC1 of 0.135 (95% CI 0.012-00.258) with a *p*-value 0.033 at 1-week and difference in Gwet AC1 of 0.111 (95% CI 0.0026-0.196) with a *p*-value of 0.012 at 6-weeks. No statistically significant change was seen between the agreement levels at 1-week and 6-weeks post intervention.

Estimated Gwet's coefficient by intervention phase

Group	Gwet's AC1	95% Confidence Interval	P-value
Baseline	0.71	0.623 - 0.797	<0.001
1-week post	0.575	0.469 - 0.680	<0.001
6-week post	0.598	0.497 - 0.701	<0.001

Table 4: Estimated Krippendorff's coefficient by intervention phase

Group	Krippendorff's Alpha	95% Confidence Interval	P-value
Baseline	0.6	0.416 - 0.778	<0.001
1-week post	0.5	0.327 - 0.691	<0.001
6-week post	0.52	0.335 - 0.694	<0.001

Table 5: Gwet's coefficient comparison between intervention Baseline and 1-week post

Group	Difference Gwet's AC1	95% Confidence Interval	P-value gwet's ttest(2016)
Baseline vs 1-week post	0.135	0.012 - 0.258	0.033

Table 6: Gwet's coefficient comparison between baseline and 6-week post

Group	Difference Gwet's AC1	95% Confidence Interval	P-value gwet's ttest(2016)
Baseline vs 6-week post	0.111	0.0026 - 0.196	0.012

Table 7: Gwet's coefficient comparison between 1-week post and 6-week post

Group	Difference Gwet's AC1	95% Confidence Interval	P-value gwet's ttest(2016)
1 week post vs 6-week post	0.0239	-0.13 – 0.08	0.64
